SOUTH END LANDMARK DISTRICT COMMISSION

NOTICE OF DECISION
Application 07-252ASE
4 RUTLAND SQUARE

CERTIFICATE OF DESIGN APPROVAL

Dear Mr. Cunningham:

At a public hearing held at Boston City Hall on 3 October 2006 the South End Landmark District Commission reviewed your application for 4 Rutland Square. The following items were approved as submitted: repoint masonry, replace damaged lintels, install new siding on two oriels, install new slate shingles on the mansard roof, repair wood dormers, flashing, and trim, install a new cedar garden fence (at rear), repair the front walk. The addition of a handrail was approved as submitted with the submission of installation details to staff.

Additionally the commission approved the installation of two (relocated) HVAC condensers, a roofdeck, and window replacement with the proviso that a subcommittee review mockups of the deck and condensers, and that staff review the conditions of the existing windows. The subcommittee (consisting of commissioners Gamp and Freeman) confirmed that the deck and condensers (once repositioned) will be minimally visible from a public way. Staff confirmed that the windows' condition warranted replacement.

Brownstone Repair: Existing masonry trim and decorative detail such as applied or incised designs shall be retained and repaired. Brownstone repair and replacement material must approximate brownstone in appearance and texture. The color may be matched by tinting with crushed brownstone or brown sand or by painting. Painting of masonry will be considered for approval only if the masonry is extremely damaged, has been patched, or the masonry is already painted. The proposed color must approximate the original unpainted masonry in appearance.

These determinations are based solely upon the information submitted to the staff with the application and presented before the commission. If statutory reviews by other authorities conflict with this decision, those actions may affect the status of this certificate. This certificate is valid for two years from the date of issue. The applicant is required to notify the commission of any changes to this proposal, and failure to do so may affect the status of this certificate. The commission reserves the right to require remedial action to bring work into compliance with commission standards if any work occurring without a Certificate of Design Approval results in significant change in the appearance of the building or if work does not meet the noted specifications of a Certificate of Design Approval. Please bring a copy of this certificate with you when filing for permits from the Inspectional Services Department (1010 Massachusetts Avenue). Photographs of the completed project should be submitted to the commission office to confirm compliance with the terms of this certificate.

Please contact staff (undersigned) at (617) 635-3850 should you have any questions. Thank you for your cooperation with the commission.

Sincerely,

Colleen M. Mungler
Preservation Planner

I. DESIGN REVIEW APPLICATIONS 5:30 PM

PLAN FILED WITH
INSPECTIONAL SERVICES DEPARTMENT
PERMIT

ADMINISTRATIVE REVIEW/APPROVAL: In order to expedite the review process, the commission has delegated the approval of certain work items, such as those involving ordinary maintenance and repair, restoration or replacement, or which otherwise have a minimal impact on a building's appearance, to commission staff pending ratification at its monthly public hearing. **Having been identified as meeting these eligibility criteria and all applicable guidelines, the following applications will be approved at this hearing:**

▶ Applicants whose projects are listed under this heading NEED NOT APPEAR at the hearing. Following the hearing, you will be issued a Determination Sheet to present at the Inspectional Services Department (1010 Massachusetts Avenue) as proof of project approval when applying for permits. ISD personnel will send an electronic copy of your building-permit application to the commission staff for review. (To avoid potential confusion, the text of your building-permit application should be consistent with the project description given below.) Commission staff will accordingly authorize the execution of the work, attaching any applicable provisos, reflecting the relevant guidelines and precedents.

▶ **PLEASE NOTE THAT FOLLOWING ISSUANCE OF THE DETERMINATION SHEET NO FURTHER CORRESPONDENCE WILL BE ISSUED FOR THE APPLICATIONS LISTED BELOW.** The electronic building-permit application as annotated by commission staff will constitute your Certificate of Appropriateness; this will be valid for one year from the date of the hearing. The applicant is required to notify the commission of any project changes; failure to do so may affect the status of the approval.

If you have any questions not addressed by the above information, please contact staff at 617.635.3850 or southendldc@boston.gov. Thank you.

APPROVED

- 17.861 SE 124 Pembroke Street: Replace roof in kind and rebuild and expand roof deck (not visible).
- 17.838 SE 36 Rutland Square: Remove and replace existing roof deck with metal railing and original front railing set back of 8' (resolution of VIO.SE.74)
- 17.858 SE 331 Shawmut Avenue: Replace 8 2/2 wood windows at rear and side in kind.
- 17.842 SE 411 Shawmut Avenue: Replace 8 aluminum clad 2/2 windows in cupola in kind.

SOUTH END LANDMARK DISTRICT COMMISSION

CERTIFICATE OF DESIGN APPROVAL
(Administrative Review)

NOTICE OF DECISION
Application #07.251SE
25 RUTLAND SQUARE

Dear Mr. Moran:

The staff of the South End Landmark District Commission has reviewed your application to restore two ground-floor curved-sash windows; replace the existing vinyl windows and panning with wood sashes and frames (as per plans filed with the application); install wood shutters on traditional pintels; and repoint mortar joints and repair the masonry stairs as needed.

Additionally, the applicant proposes to construct a roofdeck set back 11'5" from the Rutland Square roofedge; create a new garage opening at the rear; construct a street-level rear deck; and at the fourth-floor rear move the existing windows and roof section and construct a deck and an exterior stairway to the upper roof deck. Skylights will also be installed on the main roof.

The work is approved based on the following guideline:

Roof decks: Decks, including decking and railing, should not be visible from any public way. Partial visibility of the railing may be allowed on a case-by-case basis based on criteria listed in #1 above. Any visible railings must be black metal.

Brick repointing: Repointing shall match the original mortar in color, texture, joint width and profile. Mortar shall be a mix of 1 part cement, 2 parts lime and 5-7 parts sand. All residual mortar and film shall be cleaned from the elevations. All joints shall be raked by hand, no mechanical grinding is allowed.

Windows: The original window design and arrangement of window openings on the principal facade shall be retained. Changing window openings to accommodate larger or smaller sash and frame will not be permitted. All 2/2 windows shall feature integral or exterior applied fixed muntins with a trapezoidal profile, measuring no wider than 7/8". If double pane insulating glass is used, narrow dark spacer bars shall be used. Simulated muntins inserted between the panes of glass or exterior snap-in muntins are not allowed. The replacement sash shall match the original sash in all visual qualities including outside framing dimensions and brick molding. The commission will not allow a significant reduction in original glazed openings either by increased framing or wide sash and muntin dimensions. Replication of brick mold dimensions and profile is required. Panning of brick molds or trim is not allowed. If vinyl jamb liners are used they shall be of a dark color. Insulating glass is allowed by the commission. Tinted glass, however, such as low-E with argon gas will not be approved because it causes a reflection and tint that is significantly apparent from the exterior. Only half-window screens with dark screening and painted frames and tracks are allowed.

NOTICE OF DECISION
Application 04.506SE
39 RUTLAND SQUARE

SOUTH END LANDMARK DISTRICT COMMISSION

CERTIFICATE OF DESIGN APPROVAL

Dear Mr. Holland:

At a public hearing held at Boston City Hall on December 2, 2003 the South End Landmark District Commission reviewed your application to install a roof deck, replace straight and curved wood window sash, repair or rebuild the wood cornice, downers and slate roof, replace the brownstone lintels and sills with pre-cast concrete lintels and sills and repaint the wood entry trim and doors at 39 Rutland Square. The commission voted to remand final approval of the proposed roof deck and window replacement to a subcommittee (commissioners Amedeo and Gamp) at an onsite meeting. All other work is approved as presented in drawings dated November 18, 2003, except as may be noted below.

At the subcommittee meeting on December 9, a mockup of the proposed deck railing was reviewed and it was determined that the railing will not be visible from any public way within the district. With regard to the window proposal, the Standards and Criteria for the district require the retention, where possible, of original curved sash. When repair is not possible, replacement in kind is required. It is the subcommittee's understanding that the curved sash will be evaluated by a window specialist and that until their condition is assessed, the request to replace them is withdrawn. The subcommittee therefore approved the repair of the windows and understands that you will contact staff should you wish to reactivate your request to replace the curved sash.

Deteriorated brownstone lintels and sills will be repaired or replaced with pre-cast concrete elements to match. The concrete must be integrally tinted to match a brownstone color. Please provide a sample of the tinted pre-cast for onsite staff review. Guidelines for the repair of the brownstone stoop and any other repairable trim are noted below. Finally, staff of the commission must also review and approve an onsite repointing sample before the work commences.

Roof: The original roof configuration and cornice line shall be retained. *Original slate should be retained or repaired. Where necessary, replacement shingles shall be slate shingles to match the existing in color and profile.* Wood, masonry and metal cornice elements shall be retained and repaired or restored. Gutters, downspouts, flashing, whether new or replacement, unless copper, must be of a dark, non-reflective material and non-obtrusive in appearance. Flashing and drip edges shall have a thin, non-obtrusive profile and shall not obscure any significant or decorative details.

Brick repointing: Repointing shall match the original mortar in color, texture, joint width and profile. Mortar shall be a mix of 1 part cement, 2 parts lime and 5-7 parts sand. All residual mortar and film shall be cleaned from the elevations. All joints shall be raked by hand, no mechanical grinding is allowed.

Brownstone repair: Existing masonry trim and decorative detail such as applied or incised designs shall be retained and repaired. Brownstone repair and replacement material must approximate brownstone in appearance and texture. The color may be matched by tinting with crushed brownstone or brown sand or by painting. Painting of masonry will be considered for approval only if the masonry is extremely damaged, has been patched or the masonry is already painted. The proposed color must approximate the original unpainted masonry in appearance. All paint shall be latex-based and breathable. The commission recommends having a computer match of a small piece of the masonry done to establish the color of the original natural masonry.

These determinations are based solely upon the information submitted to the staff with the application and presented before the commission. If statutory reviews by other authorities conflict with this decision, those actions may affect the status of this certificate. This certificate is valid for two years from the date of issue. The applicant is required to notify the commission of any changes to this

CERTIFICATE OF DESIGN APPROVAL
(Administrative Review)

Ellen Lipsy
Executive Director
Alexa Pinard
Preservation Planner

Dear Mr. Tanguay:

The staff of the South End Landmark District Commission has reviewed and approved your application to construct a headhouse and roof deck at 136 West Newton Street. The undersigned commission staff reviewed an onsite mockup of both proposed structures and determined that neither the headhouse nor the deck will be visible from any public way within the district. Your proposal is approved as presented in drawings dated 1 July 2003.

This determination is based solely upon the information submitted to the staff with the application. If statutory reviews by other authorities conflict with this decision, those actions may affect the status of this certificate. In order to expedite the review process, the commission has delegated certain items of ordinary maintenance and repair which do not alter any exterior features to its staff pending ratification at its next scheduled public hearing. The applicant is required to notify the commission of any changes to this proposal, and failure to do so may affect the status of this certificate. The commission reserves the right to require remedial action to bring work into compliance with commission standards if any work occurring without a certificate of design approval results in significant change in the appearance of the building or if work does not meet the noted specifications of a certificate of design approval. This certificate is valid for two years from the date of issue. Please bring a copy of this certificate with you when filing for permits from the Inspectional Services Department (1010 Massachusetts Avenue). Photographs of the completed project should be submitted to this office to confirm compliance with the terms of this certificate.

Thank you for your cooperation and patience during a busy time of year. If you have any questions regarding appropriate compliance with this decision, please contact the commission staff at (617) 635-3850.

Sincerely,

Alexa Pinard
Preservation Planner

CERTIFICATE OF DESIGN APPROVAL
(Administrative Review)

NOTICE OF DECISION
Application #08.594SE
170 WEST NEWTON STREET

Dear Ms. O'Dell,

The staff of the South End Landmark District Commission has reviewed your application to remove an existing roofdeck, install a new rubber roof, and to reinstall the deck at 170 West Newton Street. The deck shall be replaced in a modified location, approximately 18" further back from the front roof edge, and extended back towards the rear of the building, as shown in plans submitted with your application. This work is approved contingent upon compliance with the following guidelines:

Roof Decks: Roof decks, including decking and railing, should not be visible from any public way. Partial visibility of the railing may be allowed on a case-by-case basis based on criteria listed in #1 above. Any visible railings must be black metal.

This determination is based solely upon the information submitted to the staff with the application. If statutory reviews by other authorities conflict with this decision, those actions may affect the status of this certificate. In order to expedite the review process, the commission has delegated certain items or ordinary maintenance and repair which do not alter any exterior features to its staff pending ratification at its next scheduled public hearing. The applicant is required to notify the commission of any changes to this proposal, and failure to do so may affect the status of this certificate. The commission reserves the right to require remedial action to bring work into compliance with commission standards if any work occurring without a certificate of design approval results in significant change in the appearance of the building or if work does not meet the noted specifications of a certificate of design approval and is not in compliance with district standards and criteria and commission policy. This certificate is valid for two years from the date of issue. Please bring a copy of this certificate with you when filing for permits from the Inspectional Services Department (1010 Massachusetts Avenue). Photographs of the completed project should be submitted to this office to confirm compliance with the terms of this certificate.

If you have any questions regarding appropriate compliance with this decision, please contact the commission staff at (617) 635-3850. Thank you for your cooperation with the commission.

SOUTH END LANDMARK DISTRICT COMMISSION

Gerry DiPiero
 46 Upton Street
 Boston, MA 02118

CERTIFICATE OF DESIGN APPROVAL

NOTICE OF DECISION
 Application #09.1045 SE
 4 Concord Square

Dear Mr. DiPiero:

At its May 5, 2009 public bearing, the South End Landmark District Commission reviewed your application to enlarge the existing roof deck at 4 Concord Square.

The Commission voted to approve your application, with final approval subject to the review of a subcommittee at a site visit. The subcommittee, composed of Commissioners Hunt and Gamp, reviewed a mock-up of the proposed roof deck expansion on May 13, 2009. The expansion of the deck at the front corner was approved, as it will be minimally visible from Concord Square. The expansion of the deck at the rear of the property was also approved, although it is visible from Worcester Street. This expansion was approved for two reasons. First, the parking lot at the rear of Concord Square does not constitute permanent open space. Second, other rear decks along the row, with similar configurations, had been approved by the SELDC in the past.

These determinations are based solely upon the information submitted to the staff with the application and presented before the Commission. If statutory reviews by other authorities conflict with this decision, those actions may affect the status of this certificate. This certificate is valid for two years from the date of issue. The applicant is required to notify the Commission of any changes to this proposal, and failure to do so may affect the status of this certificate. The Commission reserves the right to require remedial action to bring work into compliance with commission standards if any work occurring without a Certificate of Design Approval results in significant change in the appearance of the building or if work does not meet the noted specifications of a Certificate of Design Approval.

Please bring a copy of this certificate with you when filing for permits from the Inspectional Services Department (1010 Massachusetts Avenue). Photographs of the completed project should be submitted to the Commission office to confirm compliance with the terms of this certificate.

If you have any questions about this certificate, do not hesitate to contact me at 617-635-3850. Thank you for your cooperation with the South End Landmark District Commission.

Sincerely,
Emily Wolf

NOTICE OF DECISION
Application #00.232SE
45 CONCORD SQUARE

CERTIFICATE OF DESIGN APPROVAL

Dear Mr. Cohen:

At a public hearing held in Boston City Hall on October 5, 1999, the South End Landmark District Commission reviewed your application to construct a roof deck with black metal railings at 45 Concord Square. At the hearing the Commission empowered a sub-committee to view a mock-up to determine the proposed deck's visibility. On October 6 the sub-committee (Commissioners Moneyhun and Davis) determined that the deck would be minimally visible from Concord Square if the front railing is set 19' back from the front edge of the roof and the railing running along the alley is set 10' back from that edge. Your proposal is therefore approved with the above modifications.

These determinations are based solely upon the information submitted to the staff with the application and presented before the Commission. If statutory reviews by other authorities conflict with this decision, those actions may affect the status of this certificate. This certificate is valid for two years from the date of issue. The applicant is required to notify the Commission of any changes to this proposal, and failure to do so may affect the status of this certificate. The Commission reserves the right to require remedial action to bring work into compliance with Commission standards if any work occurring without a Certificate of Design Approval results in significant change in the appearance of the building or if work does not meet the noted specifications of a Certificate of Design Approval and which are not in compliance with district standards and criteria and Commission policy. Please bring a copy of this certificate with you when filing for permits from the Inspectional Services Department (1010 Massachusetts Avenue). Photographs of the completed project should be submitted to the Commission office to confirm compliance with the terms of this certificate. Please contact the Commission staff at 635-2512 if you have any questions regarding this decision.

Thank you for your cooperation with the Commission.
