545 BOYLSTON STREET

1. The current banner is providing some protection to the single wythe block wall beneath it.
2. If the banner is removed the elevation will look similar and/or worse than seen in the last two slides.
3. If allowed to leave the banner on the building, would like to bid the restoration work out this winter. Submit plans for BLC review. If approved they would like to coat the entire wall with a red brick coating after the masonry is restored.
4. Wessling Architects is currently working on the building assessment and budgets for the proposed restoration and will be in touch soon with proposed plans as soon as ownership approves the budget for the restoration.
