Re: 423 Shawmut Avenue, Boston

Dear Landmarks;

We wish to re clad the exterior bay window assembly at 423 Shawmut Avenue which is on the side street, Pembroke Street, there are two projecting bay windows on this street, starting on the second floor, we wish to re clad the front one, closest to Shawmut Avenue.

The bay window has been re clad with a clapboard like material, which is not original and is weathering. We would have this match the finishes on the other bay down Pembroke Street which appears to be original, including window head detail, dentil work at the base and metal panels between the windows.

We would also propose to scrape and paint this back bay window to then match the front, repaired bay windows.

I have attached some photographs of the existing conditions.

Thank you;

Douglas Stefanov, AIA
