South End Landmark District Commission (SELDC) - Public Hearing, 01/04/2022: PRESENTATION INFORMATION

Two (2) Viable Options for Acceptance and Approval of One (1) New Replacement Wood Window:

- 1) Pella Reserve – Traditional Double-Hung Window – Wood
- 2) Pella Architect Series – Traditional Double-Hung Window – Wood

Note:

- a) Applicant has met with a Pella representative for an introduction at the company’s showroom; a field measurement has been scheduled.
- b) Per meeting with the Pella representative, it is the Applicant’s understanding that the 2 viable options (the brand’s wood window series) listed above contain detail options to conform with historical district guidelines, such as the grilles.
- c) Applicant has been informed by the Pella representative that supply chain and lead time issue of pending orders are eminent – no timeframe provided by the representative at this time.
- d) If both viable options are acceptable for approval, Applicant wish to seek advisory from BLC/SELDC for final selection. This wish is due primarily in part by the cost and first availability due to Applicant’s projected supply chain concern.

Thanks.
