## Request for Determination of Applicability

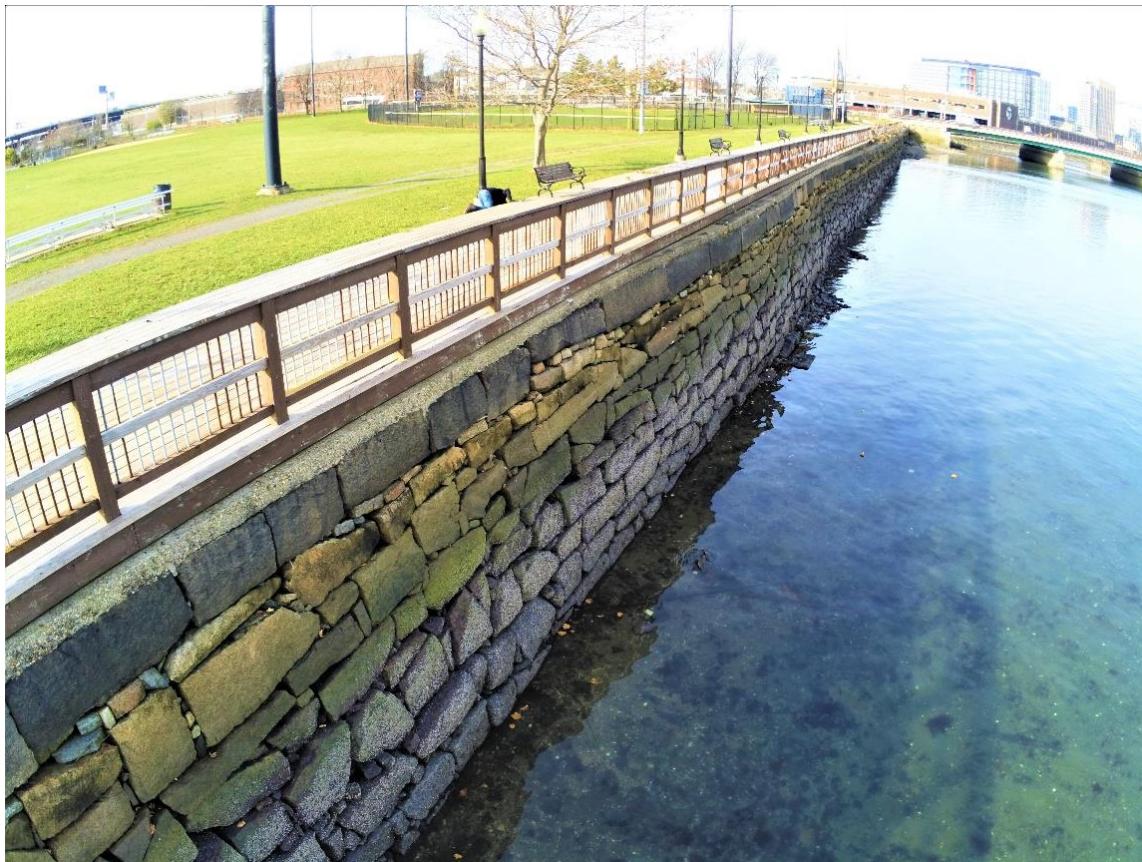

May 2022

### RYAN PLAYGROUND SOIL BORINGS

PREPARED FOR:  
BOSTON PARKS AND RECREATION  
DEPARTMENT

SUBMITTED TO:  
Boston Conservation Commission

May 18, 2022

85 Devonshire Street, 3<sup>rd</sup> Floor, Boston, MA 02109  
Tel: 617.412.4480

Mr. Nicholas Moreno  
Conservation Agent  
City of Boston Environment Department  
1 City Hall Square, Rm. 709  
Boston, MA 02201

Re:     **Request for Determination of Applicability**  
          **Ryan Playground Geotechnical Soil Investigation**

Dear Mr. Moreno:

On behalf of the City of Boston Parks and Recreation Department, Weston & Sampson Engineers, Inc., respectfully submits this Request for Determination of Applicability (RDA) to perform a geotechnical soil investigation consisting of soil borings within the Ryan Playground property, located at 75 Alford Street, Charlestown. The purpose of our geotechnical investigation will be to assess subsurface conditions in support of a geotechnical analysis and development of geotechnical design recommendations for a proposed park redevelopment project at the property. This RDA is being submitted because three of the proposed soil borings are within the 100-year flood zone. Please see Figure 1 - Soil Boring Location Plan, attached.

The property is approximately 380,965 s.f. (8.75 acres) and is currently a recreational park and open space, owned and operated by the Parks and Recreation Department. The park currently consists of a children's playground, roller hockey court, little league and adult baseball and softball fields. Also, within the park there is a facility support building, asphalt and gravel parking lots and a boardwalk at the northeast property limits at Boston Harbor and Mystic River.

The geotechnical investigation will explore subsurface conditions by advancing borings to depths up to 80 ft. or refusal within the project site. The borings will be completed using an ATV-mounted drill rig using hollow-stem augers or drive-and-wash drilling methods with split-spoon sampling. Drill cuttings will be placed on 6-mil (minimum) polyethylene sheeting segregating clean topsoil (sod) material from fill and soil materials below. Boreholes will be backfilled with drill cuttings and any excess cuttings will be placed in drums and disposed off-site at a suitable licensed soil disposal facility. Each drilling location will be restored at the surface using the segregated topsoil and sod material.

Included with this submittal is the RDA Form (WPA Form 1), abutters list (for all abutters within 300-feet of the property limits), abutter notification letters and affidavit of service. Soil boring activities will not commence until approval of this RDA application has been granted by the Conservation Commission.

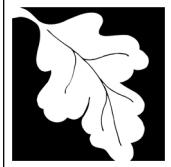

Please contact our office with any questions to this RDA filing for the soil borings at the Ryan Playground property. Thank you for your assistance.

Sincerely,

WESTON & SAMPSON ENGINEERS, INC.

Brandon Kunkel, RLA  
Practice Leader

## B. Determinations

1. I request the Boston \_\_\_\_\_ make the following determination(s). Check any that apply:  
Conservation Commission

- a. whether the **area** depicted on plan(s) and/or map(s) referenced below is an area subject to jurisdiction of the Wetlands Protection Act.
- b. whether the **boundaries** of resource area(s) depicted on plan(s) and/or map(s) referenced below are accurately delineated.
- c. whether the **work** depicted on plan(s) referenced below is subject to the Wetlands Protection Act.
- d. whether the area and/or work depicted on plan(s) referenced below is subject to the jurisdiction of any **municipal wetlands ordinance or bylaw** of:

Boston \_\_\_\_\_  
Name of Municipality \_\_\_\_\_

- e. whether the following **scope of alternatives** is adequate for work in the Riverfront Area as depicted on referenced plan(s).

## WPA Form 1 - Request for Determination of Applicability

Massachusetts Wetlands Protection Act M.G.L. c. 131, §40

### C. Project Description

1. a. Project Location (use maps and plans to identify the location of the area subject to this request):

75 Alford Street	Boston
Street Address	City/Town
0201830000	
Assessors Map/Plat Number	Parcel/Lot Number

- b. Area Description (use additional paper, if necessary):

Ryan Playground. The park currently consists of a children's playground, roller hockey court, little league and adult baseball and softball fields. The playground borders the Mystic River.

---

---

---

---

- c. Plan and/or Map Reference(s):

Ryan Playground Boring Plan	May 18, 2022
Title	Date
Title	Date
Title	Date

2. a. Work Description (use additional paper and/or provide plan(s) of work, if necessary):

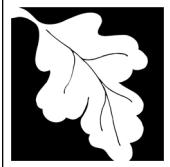

The geotechnical investigation will explore subsurface conditions by advancing borings to depths up to 80 ft. or refusal within the project site and will be completed in five workdays. The borings will be completed using an ATV-mounted drill rig using hollow-stem augers or drive-and-wash drilling methods with split-spoon sampling conducted at two-foot intervals in fill and organic soils and five-foot intervals in native inorganic soils. The boreholes will be backfilled with the soil cuttings that have been placed on plastic tarps, separating the clean topsoil from possible impacted soils below. The impacted soils will be replaced back in each drilled location below placed topsoil. Each drilling site will be restored to as near to pre-drilling condition as practicable.

Bureau of Resource Protection - Wetlands

Boston  
City/Town

## WPA Form 1 - Request for Determination of Applicability

Massachusetts Wetlands Protection Act M.G.L. c. 131, §40

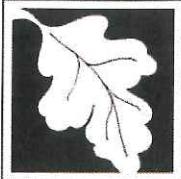

### C. Project Description (cont.)

- b. Identify provisions of the Wetlands Protection Act or regulations which may exempt the applicant from having to file a Notice of Intent for all or part of the described work (use additional paper, if necessary).

The only resource area impacted by this work is the 100-year flood zone. However, by the nature of the work, there will be no negative impacts to the flood zone. No fill will be added to the flood zone. the site will be returned to previous conditions at the end of the project. Project duration is not expected to exceed 5 days.

- 
3. a. If this application is a Request for Determination of Scope of Alternatives for work in the Riverfront Area, indicate the one classification below that best describes the project.

- Single family house on a lot recorded on or before 8/1/96
  - Single family house on a lot recorded after 8/1/96
  - Expansion of an existing structure on a lot recorded after 8/1/96
  - Project, other than a single family house or public project, where the applicant owned the lot before 8/7/96
  - New agriculture or aquaculture project
  - Public project where funds were appropriated prior to 8/7/96
  - Project on a lot shown on an approved, definitive subdivision plan where there is a recorded deed restriction limiting total alteration of the Riverfront Area for the entire subdivision
  - Residential subdivision; institutional, industrial, or commercial project
  - Municipal project
  - District, county, state, or federal government project
  - Project required to evaluate off-site alternatives in more than one municipality in an Environmental Impact Report under MEPA or in an alternatives analysis pursuant to an application for a 404 permit from the U.S. Army Corps of Engineers or 401 Water Quality Certification from the Department of Environmental Protection.
- b. Provide evidence (e.g., record of date subdivision lot was recorded) supporting the classification above (use additional paper and/or attach appropriate documents, if necessary.)

## Project Description

### Background

The City of Boston Parks and Recreation Department is exploring options for redevelopment at the Ryan Playground property, located at 75 Alford Street, Charlestown. To better inform the design team, a geotechnical investigation is required. The purpose of the geotechnical investigation will be to assess subsurface conditions in support of a geotechnical analysis and development of geotechnical design recommendations for the final proposed park redevelopment project at the property.

### Existing Conditions

The Ryan Playground property is approximately 380,965 s.f. (8.75 acres) and is currently a recreational park and open space, owned and operated by the Parks and Recreation Department. The park currently consists of a children's playground, roller hockey court, little league and adult baseball and softball fields. Also, within the park there is a facility support building, asphalt and gravel parking lots and a boardwalk at the northeast property limits at Boston Harbor and Mystic River.

### Scope of Work

The City of Boston Parks and Recreation Department is proposing to perform a geotechnical soil investigation consisting of soil borings within the Ryan Playground property. The geotechnical investigation will explore subsurface conditions by advancing borings to depths up to 80 ft. or refusal within the project site. The borings will be completed using an ATV-mounted drill rig using hollow-stem augers or drive-and-wash drilling methods with split-spoon sampling.

Drill cuttings will be placed on 6-mil (minimum) polyethylene sheeting segregating clean topsoil (sod) material from fill and soil materials below. Boreholes will be backfilled with drill cuttings and any excess cuttings will be placed in drums and disposed off-site at a suitable licensed soil disposal facility. Each drilling location will be restored at the surface using the segregated topsoil and sod material in compliance with the Activity and Use Limitation (AUL), dated February 2007. The AUL has been reviewed by a Weston & Sampson Licensed Site Profession (LSP) and they will also be onsite for the duration of the soil boring work to ensure the soil is handled accordingly.

### Environmental Discussion

This Request for Determination of Applicability (RDA) is being submitted because a total of five proposed soil borings are within resource areas protected under the Massachusetts Wetlands Protection Act and/or the City of Boston wetlands ordinance. These borings will be within land subject to coastal storm flowage (5 borings), waterfront area (4 borings), and 100-foot buffer (5 borings). There will be no borings within the 25' riverfront area. Please see Figure 1 - Soil Boring Location Plan attached, for location of soil borings and environmental resources.

### Climate Resilience

Because of the limited impacts and nature of this work, climate resiliency has not a factor. The impacts of the soil exploration to inform the forthcoming design will be temporary in nature and therefor there will be no changes to the area associated with this soil borings.

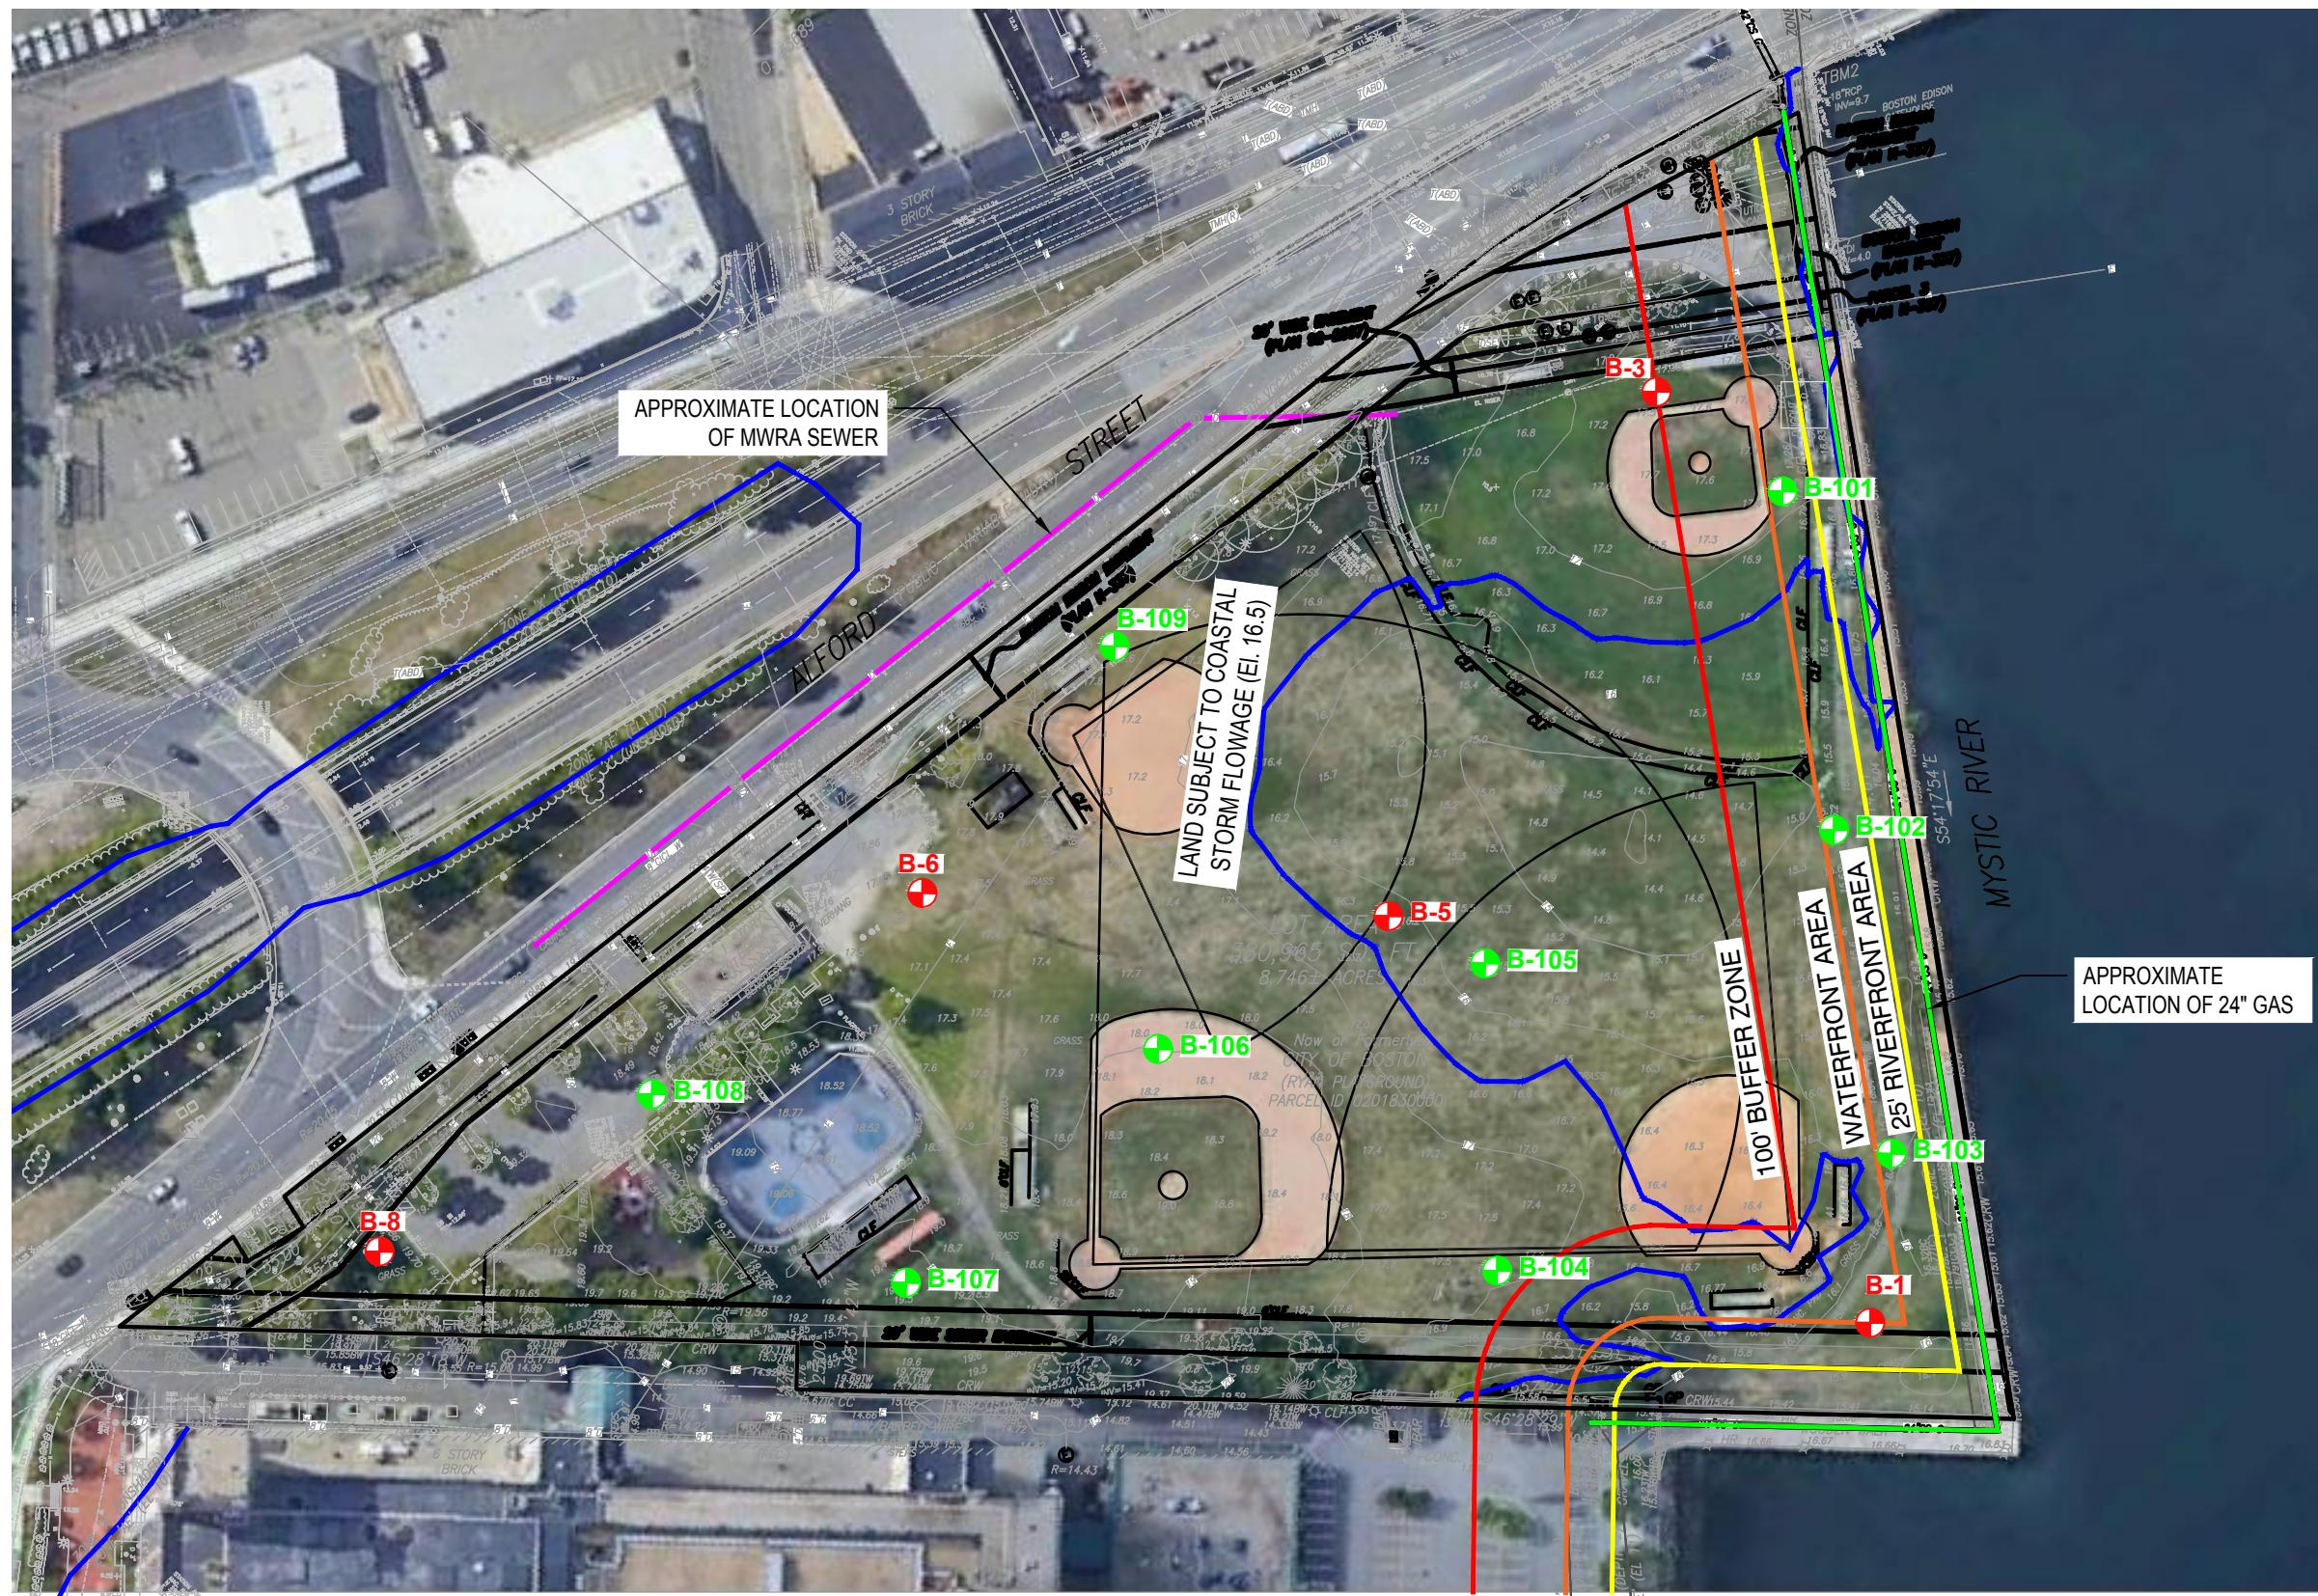

Climate resiliency is a point of emphasis in the forthcoming phases of this project and will be included in the design and redevelopment of the entire Ryan Playground parcel. The soil investigation described herein will be a cornerstone in informing the climate resilient design strategies. It is anticipated that a Notice of Intent (NOI) will be submitted in the future to the Boston Conservation commission for the redevelopment project.

**NOTIFICATION TO ABUTTERS  
BOSTON CONSERVATION COMMISSION**

In accordance with the Massachusetts Wetlands Protection Act, Massachusetts General Laws Chapter 131, Section 40, and the Boston Wetlands Ordinance, you are hereby notified as an abutter to a project filed with the Boston Conservation Commission.

A. Request for Boston Park and Rec. filed a Determination with the Boston Conservation Commission seeking permission to alter an Area Subject to Protection under the Wetlands Protection Act (General Laws Chapter 131, section 40) and Boston Wetlands Ordinance.

B. The address of the lot where the activity is proposed is 75 Alford Street

C. The project involves conducting soil borings

D. Copies of the Notice of Intent may be obtained by contacting the Boston Conservation Commission at [CC@boston.gov](mailto:CC@boston.gov).

E. Copies of the Notice of Intent may be obtained from Weston & Sampson - Brandon Kunkel 617-412-4480 x7705 between the hours of 9:00 AM - 5:00 PM

F. In accordance with the Commonwealth of Massachusetts Executive Order Suspending Certain Provisions of the Open Meeting Law, the public hearing will take place **virtually** at <https://zoom.us/j/6864582044>. If you are unable to access the internet, you can call 1-929-205-6099, enter Meeting ID 686 458 2044 # and use # as your participant ID.

G. Information regarding the date and time of the public hearing may be obtained from the **Boston Conservation Commission** by emailing [CC@boston.gov](mailto:CC@boston.gov) or calling (617) 635-3850 between the hours of **9 AM to 5 PM, Monday through Friday**.

NOTE: Notice of the public hearing, including its date, time, and place, will be published at least five (5) days in advance in the **Boston Herald**.

NOTE: Notice of the public hearing, including its date, time, and place, will be posted on [www.boston.gov/public-notices](http://www.boston.gov/public-notices) and in Boston City Hall not less than forty-eight (48) hours in advance.

NOTE: If you would like to provide comments, you may attend the public hearing or send written comments to [CC@boston.gov](mailto:CC@boston.gov) or Boston City Hall, Environment Department, Room 709, 1 City Hall Square, Boston, MA 02201

NOTE: You also may contact the Boston Conservation Commission or the Department of Environmental Protection Northeast Regional Office for more information about this application or the Wetlands Protection Act. To contact DEP, call: the Northeast Region: (978) 694-3200.

## Project Description

### Background

The City of Boston Parks and Recreation Department is exploring options for redevelopment at the Ryan Playground property, located at 75 Alford Street, Charlestown. To better inform the design team, a geotechnical investigation is required. The purpose of the geotechnical investigation will be to assess subsurface conditions in support of a geotechnical analysis and development of geotechnical design recommendations for the final proposed park redevelopment project at the property.

### Existing Conditions

The Ryan Playground property is approximately 380,965 s.f. (8.75 acres) and is currently a recreational park and open space, owned and operated by the Parks and Recreation Department. The park currently consists of a children's playground, roller hockey court, little league and adult baseball and softball fields. Also, within the park there is a facility support building, asphalt and gravel parking lots and a boardwalk at the northeast property limits at Boston Harbor and Mystic River.

### Scope of Work

The City of Boston Parks and Recreation Department is proposing to perform a geotechnical soil investigation consisting of soil borings within the Ryan Playground property. The geotechnical investigation will explore subsurface conditions by advancing borings to depths up to 80 ft. or refusal within the project site. The borings will be completed using an ATV-mounted drill rig using hollow-stem augers or drive-and-wash drilling methods with split-spoon sampling.

Drill cuttings will be placed on 6-mil (minimum) polyethylene sheeting segregating clean topsoil (sod) material from fill and soil materials below. Boreholes will be backfilled with drill cuttings and any excess cuttings will be placed in drums and disposed off-site at a suitable licensed soil disposal facility. Each drilling location will be restored at the surface using the segregated topsoil and sod material in compliance with the Activity and Use Limitation (AUL), dated February 2007. The AUL has been reviewed by a Weston & Sampson Licensed Site Profession (LSP) and they will also be onsite for the duration of the soil boring work to ensure the soil is handled accordingly.

### Environmental Discussion

This Request for Determination of Applicability (RDA) is being submitted because a total of five proposed soil borings are within resource areas protected under the Massachusetts Wetlands Protection Act and/or the City of Boston wetlands ordinance. These borings will be within land subject to coastal storm flowage (5 borings), waterfront area (4 borings), and 100-foot buffer (5 borings). There will be no borings within the 25' riverfront area. Please see Figure 1 - Soil Boring Location Plan attached, for location of soil borings and environmental resources.

### Climate Resilience

Because of the limited impacts and nature of this work, climate resiliency is not a factor. The impacts of the soil exploration to inform the forthcoming design will be temporary in nature and therefore there will be no changes to the area associated with this soil borings.

Climate resiliency is a point of emphasis in the forthcoming phases of this project and will be included in the design and redevelopment of the entire Ryan Playground parcel. The soil investigation described herein will be a cornerstone in informing the climate resilient design strategies. It is anticipated that a Notice of Intent (NOI) will be submitted in the future to the Boston Conservation commission for the redevelopment project.

### **Land Subject to Coastal Storm Flowage**

#### Performance Standards

1. When the Commission determines that LSCSF overlays or overlaps with other resource areas protected under the Ordinance, the applicable performance standards for each resource area shall be independently as well as collectively applied, and the project shall be conditioned to protect the Resource Area Values of all resource areas affected by the project and the ability of such other resource areas to protect the Resource Area Values described in Section XVII(A).

**W&S response:** In addition to LSCSF, work will occur within waterfront area and the 100' buffer. These areas do not have performance standards. The resource area value will be maintained as this work is considered both temporary and minor.

2. If LSCSF affected by proposed activity or work is significant to the Resource Area Values described in Section XVII(A), such activity shall not have an adverse impact on the subject site, adjacent properties, properties located in the adjacent Coastal Flood Resilience Zone, or any public or private way by increasing the elevation or velocity of flood or storm waters or by increasing flows due to a change in drainage or flowage characteristics.

**W&S response:** This work will have no impact on the elevation or velocity of flood or storm waters and will not increase flows. Thus, no adverse impacts to subject site, adjacent properties, properties located in the adjacent Coastal Flood Resilience Zone, or any public or private way are anticipated.

3. If LSCSF is significant to flood control or storm damage prevention, the proposed activity or work shall not result in flood damage due to filling, which causes lateral displacement of flood waters that, in the judgment of the Commission, would otherwise be confined within said area. The Commission, in its sole discretion, may permit such activity so long as the activity will not have an adverse impact on said area's ability to provide storm damage prevention and flood control; provided, further, that the activity or work incorporate best management practices to reduce or eliminate damage resulting from SLR and coastal storms.

**W&S response:** This project does not propose any filling and will not result in flood damage.

4. If LSCSF receives and holds coastal flood waters, the proposed activity or work shall not impact the ability of the area to receive, hold, and laterally spread flood waters if it causes

unnatural redirection, refraction, diffraction, or reflection of coastal flood waters and waves.

**W&S response:** This work is both temporary and minor in nature and will not impact the ability of the area to receive, hold, and laterally spread flood waters.

5. If LSCSF receives coastal flood waters that naturally flow across the landform surface without redirecting or channeling the flow, the proposed activity or work shall not cause flood water to become redirected or channeled or increase in velocity, so as to cause erosion, scour, and increased storm damage to the project's locus and adjacent areas.

**W&S response:** This work is both temporary and minor in nature and will not cause floodwater to become redirected or channeled or increase in velocity.

6. If LSCSF is significant to wildlife and their habitat, proposed activity or work shall not impair the capacity of those portions of LSCSF to provide important wildlife habitat functions.

**W&S response:** The current land use is recreational fields, which are providing minimal if any wildlife habitat functions. This work is both temporary and minor and will not have any impact to wildlife habitat.

7. If LSCSF is significant to the prevention of pollution, proposed activity or work shall not have an adverse impact on the characteristic of the LSCSF to remove suspended solids and other contaminants from runoff before entering into other wetland resource areas or a body of water.

**W&S response:** This work is both temporary and minor in nature and will not impact the ability of LSCSF to remove suspended solids and other contaminants from runoff.

8. Proposed work or activity in LSCSF which results in alteration to vegetative cover, interruptions in the beneficial supply of sediment to other wetland resource areas, or changes to the form or volume of a dune or beach, and such result will have an adverse impact on said dune or beach's ability to provide storm damage prevention and flood control, is prohibited.

**W&S response:** This work will not result in any alteration to vegetative cover.

9. Notwithstanding Sections XVII(E)(1) through (8), the Commission may, in its sole discretion, permit the following activities provided that the applicant demonstrates to the satisfaction of the Commission that best available measures, as defined by the Ordinance, are utilized to minimize or eliminate adverse impacts on the critical characteristics of and Resource Area Values protected by LSCSF described in Section XVII(A) herein, and provided further that all other performance standards for overlapping or overlaying wetland resource areas are met:
  - a. Limited projects as specified in the Act at 310 Code Mass. Regs. 10.24(7);46

- b. Beach and bank nourishment and restoration projects, including fencing, native plantings, and other projects designed to increase resource area stabilization and decrease erosion;
- c. Pedestrian walkways for public shoreline access and nonmotorized use;
- d. Improvements necessary to maintain or improve the structural integrity or stability of an existing coastal engineering structure, as that term is defined by the Ordinance;
- e. Projects which will protect, restore, rehabilitate, or create a wetland resource area;
- f. Projects that are approved, in writing, or conducted by the Commonwealth of Massachusetts Division of Marine Fisheries that are specifically intended to increase the productivity of land containing shellfish, including aquaculture, or to maintain or enhance marine fisheries;
- g. Projects that are approved, in writing, or conducted by the Commonwealth of Massachusetts Division of Fisheries and Wildlife that are specifically intended to enhance or increase wildlife habitat;
- h. Projects that are designed and intended to reduce the risk of coastal flooding, inland flooding, extreme weather events, SLR, and other adverse impacts of climate change, including, but not limited to, strategies and plans described in Climate Ready Boston or any successor initiative of the City,
- i. Flood mitigation projects designed and intended to have no significant adverse effect on the ability of LSCSF to protect from storm damage and flood control, and
- j. Projects involving the installation of scientific testing and monitoring equipment provided that it is temporary in nature and will not alter LSCSF.

**W&S response:** This work does not fall under any of these activities.

10. In the interest of storm damage prevention, flood control, and prevention of pollution, should the Commission permit activity or work in LSCSF that is part of new construction or constitutes substantial improvement to an existing structure, the Commission may condition the permitted activity or work so that any critical building systems, infrastructure, or equipment is located two (2) feet above the anticipated BFE expected to occur within the next 50 years based on the best available data and projections of SLR. 47
- a. In the event that the proposed work or activity is temporary, then any critical building systems, infrastructure, or equipment shall be located two (2) feet above the anticipated BFE at the conclusion of the project's determined duration of the temporary work.
  - b. At a minimum, the anticipated BFE shall be based on the best available and most recent data and projections for SLR made available by the City or any of its agencies, boards, commissions, or quasi-City agencies, including, but not limited to, data and information made available through the Climate Ready Boston initiative or any successor initiative.
  - c. In the event that elevating or relocating critical building systems, infrastructure, or equipment is not practicable, as determined by the Commission, the Commission may require the Applicant to employ other floodproofing strategies such as

floodwalls or shields, and the Applicant shall, at a minimum, secure such equipment with anchors or tie-downs to prevent flotation.

**W&S response:** This work is both temporary and minor. Any equipment used will be located two feet above the anticipated BFE at the conclusion of the project.

11. When any proposed work or activity in LSCSF is located within an ACEC, the proposed work or activity shall have no adverse impact upon the Resource Area Values described in Section XVII(A) and shall fully mitigate any impacts resulting from the proposed work or activity.

**W&S response:** This work is not within an ACEC

12. Section XVII(E)(11) shall supersede the provisions of Section XVII(E)(9)(i) through (viii), but it shall not apply if the presumption set forth in Section XVII(D) is overcome.

**W&S response:** Noted.

13. Notwithstanding the provisions of Section XVII(E)(2) through (X), no project may be permitted which will have any adverse impact on specified habitat sites of rare vertebrate or invertebrate species indicated on the most recent Estimated Habitat Map of State-listed Rare Wetlands Wildlife (if any) published by the Massachusetts NHESP.

**W&S response:** There is no NHESP habitat within the project area.
