

The funding period for this RFP is on or about May 1, 2023-April 30 2024. Contingent upon available funding and the Bureau's needs we may extend this contract for additional years. The funding sources provided on page 4 are examples of the types of funding and dollar amount that may be used to support the awarded vendor's projects annually. The funding period for each source should have little to no impact on the awarded vendor's annual scope of work. However, it is important to understand for project planning and billing purposes. For the purposes of this application, we recommend that you provide us with an hourly rate for services rendered, along with any additional project costs.
